NEW GOLD MILL FOR TAILINGS

Description of the Plant Going Into Commission at Bamberger's De Lamar Mines.

ODIN STRIKE PROVING BIG

ATTRACTS ATTENTION.

Several Good Properties.

Among the claims, other than the Cosgrove group, on which more or less development has been performed, is the Letitia lodge, one-half mile distant from the Cosgrove and one the same lead, owned by John Gassett of Whitewater. The tunnel shows three and one-half feet of mineral of the same character as Kelly's. He expects to make a shipment of a carload in the near future. J. W. McCauley owns the Fox Nos. 1 and 2 and the Fourth of July, on a parallel vein some distance away, and, considering the amount of development done, the showing is most promising. The Emma lode on the same vein as the Cosgrove, owned by Messrs. Kelly, White and J. W. Hanson, shows four feet of ore. Development with the same vein as the Cosgrove, owned by Messrs. Kelly, White and J. W. Hanson, shows four feet of ore. Development with the same vein as the Cosgrove, owned by Messrs. Kelly, White and J. W. Hanson, shows four feet of ore. Development with the product by gravity and at a minimum of cost. The tailings will be scraped by means of wheel scrapers to a small hopper above the mixing box situated of the side of the division by Messrs. Kelly, White and J. W. Hanson, shows four feet of ore. Development with the claim at an early date. hopper above the mixing box situated on the side of the dump. A five-horseon the side of the dump. A five-horsepower motor supplies the power for
operating the mixer into which a
stream of diluted cyanide solution is
constantly delivered by a No. 6 centrifugal pump. The product from the
writer consisting of sends elimon and the strike. The district is highly mineralized

Ore Goes \$25 to \$200 Per Ton.

tion of values was a recent mill run of four lots of the mineral, the lowest of which yielded an ounce and a fraction of gold, 25 ounces in silver and a small per cent in copper to the ton, and the highest 5 ounces gold, medium values in silver and a high percentage in copper.

Mr. Kelly has done about \$12,000 worth of development, consisting of cross-cuts, drifts and shafts, and wherever exposed the vein is strong and well defined. The vein cuts through the granite formation similar in character to that in the Blackhawk and Central City districts, and is capped over with limestone. On the dump there are at least 500 tons which with a little sorting will pay handsomely to ship in its crude state to smelters. White and Arthur located claims on the extension of the Cosgrove vein, and it is the intention to open them up as extensively as possible this season. There are other large, undeveloped fissure veins outcropping across the mountain, on which only a few locations have been made, and apparently only need development to reveal valuables mines. The made, and apparently only need development to reveal valuables mines. The veins as a rule are large, the wails trim, and gold and copper are the principal

L. W. White and E. M. Arthur, of Telluride, Colo, have been making discorper company for the benefit of the property of the country about the first of the year and a few weeks later appeared in Grand Junction with quantities of fine looking quartz carrying high values in gold together with some silver and copper. Messrs, White and Arthur and their associates are confident the country is going to boom and seventhur and their associates are confident the country is going to boom and seventhur and their associates are confident the country is going to boom and seventhur and their associates are confident the country is going to boom and seventhur and their associates are confident the country is going to boom and seventhur and their associates are confident the country is going to boom and seventhur and their associates are confident the country is going to boom and seventhur and their associates are confident the country is going to boom and seventhur and their associates are confident to get work started and he will be followed by other members of the party interested during the next few days.

The scene of the locations is near a place locally called Kellysville, twenty miles from Whitewater and the Sinbad mining district in Utah. They are situated on a mountain and there are fruit orchards in five miles of Kellysville. This place gets its name from J. C. Kelly, who for several years has been working a group of four claims, known as the Cosserve, located on the side of the mountain and there are fruit orchards in five miles of Kellysville. This place gets its name from J. C. Kelly, who for several years has been working a group of four claims, known as the Cosserve, located on the side of the mountain and there are fruit orchards in five miles of Kellysville. This place gets its name from J. C. Kelly, who for several years have been negotiating for the purchase of the mountain and there are fruit or the property in the property in the definite capacities. Uncertion of such persons.

Tit is

A telephone message from Superinten-dent Peter Kass Wednesday evening brought the news that he then had a The four claims lie adjoining on the same vein, which carries from three to three and one-half feet of ore that, according to repeated assays and mill tests, runs from \$25 to \$200 per ton in gold, silver and copper. The last determination of the same vein, which carries from three to the four three to the same vein, which carries foot face of \$40 ore. The task of getting the ground opened up is being carried forward as rapidly as conditions will allow and the superintendent is sanguine that, by the time the roads

are open to good hauling he will be a position to hit the market regularly with a fine grade of ore.

It is the intention of the management of this property to push the tunnel through from the big ledge that is now being prospected to a parallel fissure a short distance east, but that work can hardly be undertaken with satisfaction until the workings now developing ore are a little father advanced

Mining Notes.

Four carloads of ore from Nevada and two from Alta were reported at the Pio-neer sampler yesterday morning. Broker H. B. Cole left to St. George last night to visit with Mrs. Cole, who is spending the winter there for the benefit of her health.

W. C. Alexander of the Black Diamond company's properties at Stockton leaves for the east today on business connected with his company's affairs.

The Utah mine of Fish Springs is in the market with a carload of ore which mine assays indicate should carry 125 ounces silver and close to 50 per cent

James Quinn, manager of the East & West company's properties at Ophir, will move his family out and occupy his residence at camp for the season on Monday

It is reported that conditions at the New York Bonanza at Park City are steadily improving. A little more ore is beginning to show and the outlook is counted as most encouraging J. L. Hackett who, with A. H. Godbe and others, is largely interested in the

Manager Solon Spiro of the Little Bell and Silver King Consolidated companies is back from his trip to the coast, having left Mrs. Spiro and her mother in Los Angeles. As soon as the storm is over Mr. Spiro will make a trip to the Park, and later, about the first of the month, he will rejoin Mrs. Spiro.

month, he will rejoin Mrs. Spiro.

The report concerning the strike in the Uncle Sam yesterday was to the effect that a drift on the 500-foot level was progressing through a full breast of first class ore. It was also said that the company had shipped some \$12,000 worth of ore so far this month and that several more carloads were to be heard from. N. Lehman of the Yankee Consolidated, was in the city yesterday on business for the company. Today he will

HEPBURN BILI

President, It Is Announced, Will Not Interfere With the Function of Congress.

AMENDMENT CONSIDERED

MEETING AT WHITE HOUSE IS HELD.

Washington, Feb. 21.-When the sen ate committee on interstate commerce meets on Friday to vote on a rate bill the announcement will be made authoritatively that President Roosevelt will not attempt to prevent amend-ment of the Hepburn bill; that he will leave the committee free to exercise A special meeting of the Western Exploration company has been called for the 28th. At that time several matters of importance will be acted upon and the expectation is that the signal will then be given to cut loose at the Honerine.

It is best judgment and if possible compromise its differences; that if a bill is reported which does not meet his approval and in that form is passed by congress he will content reported which does not meet his content congress he will to exercise his himself veto southern country has returned from a business trip to Los Angeles. Within a few days he will leave for his home in Louisville for a few days, to return later in the season.

This announcement will be made as the result of a conference here today between the most active persons supporting the house bill without amendment but will be delivered to the committee by a senator who has supported an amendment providing for judicial review of an order of the interstate commerce commission.

Knox's Amendment Considered.

The conference at the White House is one of many that have been held there in the last week for a discussion of the railroad rate question It was attended by Senators Dolliver and Clapp, Speaker Cannon, Representative Hepburn and Attorney General Moody. They had under consideration an amendment said to have been drafted ress for the company. Today he will go to Bingham and the supposition is that he is going out to look into the rethods of milling ore as practiced in that camp, as the Yankee is just getting ready to erect a plant of its own by Senator Knox and revised by the ed in a spirit of compromise and the President and attorney general wanted to know whether it would be ac ceptable to the members of congres who are making a fight to prevent the adoption of any amendment which they believe would interfere with the operation of the measure they purpose o enact into law.

Briefly stated, the amendment aims to give to any complainant authority to file a petition in a circuit court asserting that a rate fixed by the commission was in fact illegal or that an order of the commission was in reality unlawful, and authorizes the court to hear the suit to decide whether the commission acted within its authority and whether the constitutional rights of the plaintiff had been violated.

All Stand for Hepburn Bill.

Hepburn bill in its present form and said that none of the amendments suggested seemed to be an improve-They said that if the bill specified the conditions under which complaints could be taken into court, the court might refuse to take cognizance of matters not specified in the bill. They said they preferred to leave open every feature under which an aggrieved person might desire to go for an amendment providing for judi-into court. Attorney General Moody, into court. Attorney General Moody, it is said, contended that the Hepburn bill is constitutional and there is no danger of its being overturned by the United States supreme court. The Senator Cullom is considered that the Hepburn and Carmack will not be present when the committee meets on Friday, but as United States supreme court. He Senator Cullom is opposed to amend amending the bill, taking the position that that is a function outside of will be held tomorrow, but it is agreed

his official province.

After Senators Dolliver and Clapp returned to the capitol they told certain colleagues that they would go into the committee on Friday and make a firm stand to have the bill reported without amendment. When asked concerning the attitude of the president they said that they believed he is satwith the bill as it stands, but that it is too much to say that he is opposed to any amendments whatever.

President Roosevelt's Position.

The president was described by them as ready to consider any amendments that might be offered and willing to listen to any proposition up to the time the bill is placed on its final passage.

They said that if anything should be brought forward which in the of friends of the bill would better it and not obstruct its operation, the president would give it careful study. Conservative members of the committee assert that they have the necessary votes to amend the Hepburn bill if they are left free to exercise their growers, in convention assembled, still individual judgment so that they will endorse the resolutions adopted in ref- not be put in the position of opposing the president's policy. \$1,000,000 LOSS BY FIRE Central Station of San Fran-

cisco Gas & Electric Company Destroyed. San Francisco, Feb. 22.-A fire early

this morning in the central station of the San Francisco Gas & Electric company caused a loss estimated at nearly \$1.00.000, besides crippling many commercial and manufacturing establishments, though not so seriously as would be the case where not this a holiday. All of the evening papers for nours were without power to run their machinery, even the linotypes being rendered useless. Candles and kerosene lambs were used to illuminate many dark offices, elevators were not running and business was almost at a standstill in some places. Nearly all of the telegraph wires leading out of this city were idle, both the Western Union and Postal companies having obtained their power from the station which was burned.

After a long delay the evening papers succeeded in securing power from nearby plants and appeared today, though there were no early editions.

The origin of the fire, which completely gutted the building in which it originated, has not been positively determined. Workmen who were in the building at the time say that there was a flash, followed by a sheet of flame, and in a few moments the flames had broken that some of the dynamos were overcharged and exploded.

The flames communicated at once with waste and oil and were immediately beyond control. In imminent danger of their lives, the employes "plugged out" before trying to make their escape, thus preventing a neavy draft and weakening of the other power stations.

The fire was accompanied by a series of explosions, and the firemen worked at the risk of their lives but, as the burning station was in the very heart of the city, they did not relax their efforts until the danger of a great conflagration was over.

During the progress of the fire sixteen persons were hurt, only one. William this morning in the central station of the San Francisco Gas & Electric company

forts until the danger of a great conflagration was over.

During the progress of the fire sixteen persons were hurt, only one, William Ken, however, sustaining any serious injury. He was taken to a sanitarium and it is said will recover.

The officers of the gas and electric company state that their loss will be about \$50,000. but others place the figure at \$1,000,000. Six engines, valued at from \$60,000 to \$150,000 each, were destroyed, as was also the generating plant, worth \$125,000.

Three hundred and fifty teams are at work clearing away the debris.

Government Asked to Give Opportunity for Big Enterprise.

(Special to The Herald.) Washington, D. C., Feb. 22.—Senator Warren today introduced a bill to permit Warren today introduced a bill to permit the state of Wyoming to relinquish about 19,000 acres of state lands to the general government and take up other lands in lieu. The lands sought to be relinquished are along the Green river, in western Wyoming, and are desired for irrigation under the Carey act in connection with contiguous lands, an individual enterprise being ready to take up the proposition if the entire tract can be secured.

OLD DOMINION FIRE.

As they had previously announced they would do, all those called into the conference made a firm stand for the better has taken place in the Old Dominion mine. The danger point has been passed and rehabilitation of the mine been passed and rehabilitation of the mine will now proceed. The tenth level was reached at 10 o'clock last night by the men lining the pump compartment with canvas. Gas is not quite so bad in the mine, but when it will be opened by removal of the bulkheads is hard to say. There is a great deal of timber in old stations of the burned shaft which will smoulder for some time. smoulder for some time
